PROFILE SUMMARY

Frontend Engineer with 5 years of experience in React, Next.js, Angular, TypeScript, and modern web technologies. Experienced in applying AI-assisted development and automation across coding, debugging, CMS migration, content workflows, and website optimization. Currently focused on expanding into practical AI implementation while building scalable, user-focused products.

TECHNICAL SKILLS

- Frontend:** React, Next.js, Angular, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap
- AI & AI-Assisted Development:** Claude, Claude Code, Claude Design, Claude Projects, Cursor, Kiro, Typeless; AI-assisted coding, UI generation, debugging, refactoring, documentation, workflow automation
- CMS & Web:** Astro, Strapi, Storyblok, Responsive Design, Accessibility, SEO, Web Performance
- API & Integration:** REST APIs, Axios, Fetch
- Testing:** Jest, Jasmine, Cypress, BrowserStack, LambdaTest
- Tools & Analytics:** Git, GitHub, Figma, GA4, Google Search Console, Semrush, HubSpot

EDUCATION

2013 – 2015

Master of Science (Physics)

Jain University

Completed a Master of Science in Physics with a specialization in Electronics, securing a CGPA of 6.9

2011 - 2013

Bachelor of Science (Computer Science)

SK UNIVERSITY

Completed a Bachelor of Science in Computer Science with a CGPA of 7.1.

CAREER HISTORY

2025 – Present

Website Manager

Securin Labs

Develop and manage responsive, SEO-focused web experiences using modern frontend technologies and CMS platforms. Work across Astro, Strapi, Storyblok, React, and Next.js while collaborating with design, content, marketing, and engineering teams.

2021 – 2025

Senior Software Engineer

SmartX Technologies

Developed responsive and accessible web applications using React, Angular, and Next.js. Built reusable UI components, integrated REST APIs, translated designs into high-performance interfaces, and collaborated with cross-functional teams.

2015 - 2019

Lecturer

Previous Experience

- Vijetha Inter and Degree College – Senior Lecturer (2018–2019)
- Enlight Degree College – Lecturer (2016–2017)
- Sri Chaithanya Junior College – Lecturer (2015–2016)

CORE STRENGTHS

- Leadership
- Teamwork
- Communication
- Innovation
- Problem Solving
- Collaboration
- Adaptability
- Mentorship

AI-DRIVEN DEVELOPMENT & AUTOMATION

- Integrated AI into daily development workflows using Claude, Claude Code, Cursor, Kiro, and AI design tools to accelerate UI development, debugging, refactoring, and implementation.
- Used AI to transform requirements and designs into production-ready frontend components, explore solutions, generate documentation, and streamline repetitive development tasks.
- Applied AI-driven workflows to CMS migration, content structuring, website optimization, and automation of recurring data and content operations.
- Leveraged AI for faster requirement analysis, technical problem-solving, code reviews, and development workflow optimization, improving overall delivery efficiency.

SELECTED PROJECT EXPERIENCE

SECURIN LABS — Website Manager | 2025–Present

- Develop and maintain Securin's and Securin Labs web platform across product, platform, use-case, and security content experiences.
- Led the website revamp and CMS migration, moving articles and technical reports to an Astro + Strapi architecture and improving content workflows.
- Developed the Vulnerability Intelligence Database with live CVE data integration, automated updates, and dynamic vulnerability listings.
- Improved technical SEO, accessibility, Core Web Vitals, and website performance through continuous monitoring and optimization.
- Implemented automated data workflows and integrations for recurring content and vulnerability data operations.
- Collaborated with design, content, marketing, and engineering teams to deliver production-ready web experiences.

SMARTX TECHNOLOGIES — Senior Software Engineer | 2021–2025

AptPath — Education Platform | React, Tailwind CSS, MUI, Axios

- Architected the frontend component structure from scratch for a scalable education application.
- Built role-based interfaces and integrated multiple backend APIs to support application workflows.
- Developed reusable UI components using Tailwind CSS and MUI to maintain consistency across the platform.

Catrion — Cybersecurity Portal | Angular, CSS

- Developed responsive enterprise interfaces for cybersecurity workflows and reporting.
- Integrated APIs and implemented custom features to support business requirements.
- Optimized frontend performance and collaborated with cross-functional teams to deliver UI enhancements.

Wexl — Role-Based Business Application | Angular, JavaScript, Cypress

- Developed four role-based application modules with reusable UI components and REST API integration.
- Built responsive layouts and reusable components across multiple application modules.
- Mentored the QA team in developing Cypress automation scripts and supported frontend testing.

Federal Bank — Banking Portal | HTML5, CSS3, Bootstrap 4, WCAG 2.2 AA

- Developed responsive banking interfaces from Figma designs while following WCAG 2.2 AA accessibility standards.
- Implemented accessible UI patterns and optimized layouts across different screen sizes.
- Ensured cross-browser and cross-device compatibility through responsive testing.

ICICI — Banking & Financial Services UI | Angular, Chart.js

- Developed responsive UIs for loan calculation, credit card, and analytics workflows.
- Built dynamic data visualizations and reusable dashboard components using Chart.js.
- Implemented lazy loading and frontend optimizations to improve application performance.

Marble — Enterprise Application | Angular, CSS

- Built reusable UI components with dynamic routing, form validation, and client-driven features.
- Implemented UI enhancements based on client requirements and delivered responsive interfaces.
- Improved frontend performance through component-level optimization.

Tea Withering — Web Application | React, Tailwind CSS, Axios

- Migrated legacy HTML pages into modular React components to improve reusability and maintainability.
- Integrated REST APIs and developed responsive interfaces using Tailwind CSS.
- Improved application structure through reusable components and scalable frontend patterns.

PREVIOUS EXPERIENCE

Lecturer | 2015–2019

- Taught Physics and Electronics across undergraduate and intermediate-level programs.
- Developed strong communication, mentoring, and presentation skills through teaching and student interactions.
